Phase Two of South Howell Avenue Construction Project Begins July 8, 2015

Project expected to be completed in November 2015, weather permitting

On Wednesday, July 8 Phase Two of the City of Milwaukee's South Howell Avenue construction project from West Howard to West Layton avenues will begin. The project began in April 2015 and is projected to be completed in November 2015, weather permitting.

Phase Two entails reconstructing the west side of S. Howell Ave. (southbound lanes of traffic). Two-way traffic – one lane in each direction – will move to the newly completed east side of the street (northbound lanes).

The Milwaukee County Transit System will maintain its current bus service on S. Howell Ave., with bus stops moving to the medians when construction prevents stopping at the curb.

The project includes:

- Replacing the existing pavement with a new concrete pavement
- Widening the roadway to include a bicycle lane in each direction
- New curbs and gutters
- Selected new sidewalks based on current conditions and grade differentials

Please visit the DPW website at www.city.milwaukee.gov/mpw for more information, including a project map.
